Day 1

Sossus Oasis Campsite, Sesriem

As there is no accommodation at Sossusvlei, visitors to this desert wilderness are likely to end up staying at Sesriem, 65 kilometres away, where camps and lodges serve as a base from which to explore the dunes. Sesriem Canyon, a deep chasm carved through the rocks by water, is a striking natural feature of the area that is best explored on foot. Stony walls rise up sharply on both sides of the canyon, while birds roost in its crags and lizards dart along the ledges. The canyon's name was coined when early settlers used it as a water source, using six lengths of leather ('ses riem – six thongs) tied together to lower buckets into the water at the base of canyon.)

Day 2

Sossus Oasis Campsite, Sesriem

Day Itinerary

Day 2 - Sunday

Route: Sesriem – Sossusvlei - Sesriem

Journey: We'll need to be on the move an hour before dawn as we make our way through a dry riverbed and across the gravel plains towards the Namib Dunes. We'll stop at Dune 45 before making our way to Sossusvlei with age old sands said to be around five million years old. Dead Vlei with its white pan and contrasting black scorched trees is also on our visit list. Whilst this region appears to be lifeless there are a variety of animal species that have adapted to these conditions and if we're lucky may see Oryx antelope, ostrich, springbok and don't forget about the birdlife and reptiles that inhabit the area. Return to our campsite for lunch, late afternoon visit to the Sesriem Canyon where the ephemeral Tsauchab River has shaped the area over millions of years.

Activities

Morning	Dune 45
Morning	Sossusvlei
Morning	Dead Vlei
Afternoon	Sesriem Canyon

Dune 45

Named for its location 45 kilometres past the town of Sesriem, Dune 45 is renowned for its elegant shape, which – along with its position close to the road – have earned it the distinction of 'most photographed dune in the world'. If you're not keen for the strenuous hike to the top of Big Daddy, Dune 45 is a more forgiving alternative, standing at only 80 metres and featuring a much gentler gradient.

Sossusvlei

Located in the scenic Namib-Naukluft National Park, Sossusvlei is where you will find the iconic red sand dunes of the Namib. The clear blue skies contrast with the giant red dunes, making this one of Africa's

most scenic natural wonders and a photographer's heaven. This awe-inspiring destination is possibly Namibia's premier attraction, with its unique dunes rising to almost 400 metres - making them some of the highest in the world. These iconic dunes come alive in morning and evening light and draw photography enthusiasts from around the globe. Sossusvlei is home to various desert wildlife, including oryx, springbok, ostrich and a variety of reptiles. Visitors can climb 'Big Daddy', one of Sossusvlei's tallest dunes; and explore Deadvlei, a white, salt, claypan dotted with ancient trees.

Dead Vlei

This ancient clay pan was once an oasis, studded with acacias and fed by a river that suddenly changed course, leaving the earth to dry up along with the trees it previously supported. So dry were the climatic conditions that the trees never decomposed – instead they were entirely leached of moisture so that today, 900 years later, they remain as desiccated, blackened sentinels dotting the pan's cracked surface. Surrounded by the red-pink dunes of the Namibia Desert, they create a surreal spectacle that is a photographer's dream.

Sesriem Canyon

Sesriem Canyon is a captivating natural wonder located in the heart of the Namib Desert in Namibia. Carved over millions of years by the Tsauchab River, this narrow gorge is a testament to the power of erosion. The name Sesriem comes from the Afrikaans and Dutch words for six leather straps, which early pioneers used tied together to draw water from the deep pools within the canyon. Sesriem Canyon is not only a geological marvel but also a haven for unique desert flora and fauna, making it a popular stop for tourists exploring the surreal landscapes of the Namib Desert.

It was this spring that attracted Stone Age hunters over six thousand years ago, and it was during this time that the extensive group of rock engravings and paintings were produced. Etosha is protected by the Etosha Pan National Park surrounded by savannah plains and woodlands supporting large herds of elephants. When dry, the pan sustains little life except for the algae that gives it its distinctive colour, and migratory birds that use it as a pit stop, but with heavy rain it becomes a shallow lake where flamingos breed, pelicans wade and feed, and a variety of mammal species come to quench their thirst, including leopards, lions, white rhinos, hunting dogs and antelopes.

Etosha West

Situated in the western part of Etosha National park, a world-famous wildlife sanctuary in the northwestern part of Namibia, Etosha West is the wilder western region accessed through Galton Gate. Visitors to Etosha

West can look forward to exploring the magnificent scenery of this remote north Namibian landscape characterised by lush undulating terrain and a reddish-brown soil, which is a stark contrast to the white dusty clay soil of Etosha East's flat expansive plains. This area is home to several species not found in the rest of the park: baboons, Mountain Zebra, and Brown Hyena, as well as several unique plants. The area also boasts numerous waterholes attracting elephant, rhino, leopard, lion, a variety of buck, and around 300 bird species.
